THIS IS
EXTRAORDINARY
WORK

Join the journey with daa's Technology & Data Innovation Graduate Programme.

Ready to shape the future of airport tech? Over two years, you'll rotate through two dynamic streams—Technology and Data—solving real-world challenges that keep Ireland's airports running. Whether you're building digital tools or unlocking insights from data, you'll make a real impact across operations, retail, digital, and more.

You choose your specification

> Technology

Get hands-on with cloud, DevOps, app development, networking, and enterprise IT. Perfect for graduates with a passion for tech and innovation, especially those with skills in programming, cloud infrastructure, and enterprise applications.

What you will work on:
As a **Technology Graduate,** you will be at the forefront of airport innovation:

- Build apps, integrations & automation tools.
- Configure cloud/on-prem infrastructure.
- Support IT services & networking.
- Prototype tech solutions with business teams.
- Work on real-time systems powering 24/7 operations.

> Data

Work with business teams to design data-driven tools—dashboards, models, and apps—that power smarter decisions. Ideal for inquisitive, analytical thinkers with strong communication skills and backgrounds in Maths, Stats, Economics, Physics, Engineering, or Product Design.

What you will work on:
As a **Data Graduate**, you will turn data into decisions:

- Design dashboards & data products.
- Build cloud-based data pipelines.
- Develop models to solve business challenges.
- Analyse processes & uncover insights.
- Collaborate across teams to deliver scalable solutions.

Technology & Data Innovation

What are we offering you?

- Competitive salary with a performance-related bonus.
- Flight subsidies, access to Airport Lounges and Fast Track.
- Support to earn Industry-recognised certifications.
- Structured learning and development.
- Personalised coaching and mentoring to guide your career journey.
- Projects across daa's business units — including Airfield Operations, Airport Operations, Retail, and Commercial ecommerce often with direct placement in specialist teams.
- Exposure to cutting-edge technologies in cloud and on-premise tech.
- Collaborative and inclusive culture.
- On-site gym and pool.

Do you have what it takes?

We're looking for curious minds and bold thinkers ready to shape the future of airport technology. To thrive in this programme, you should:

- Hold (or be expecting) a 2.1 degree or higher in a relevant field such as Computer Science, Engineering, Mathematics, Product Design, or related disciplines.
- Bring strong teamwork, communication, and interpersonal skills — collaboration is at the heart of everything we do.
- Show ambition, integrity, and a growth mindset — we want people who are eager to learn, adapt, and lead.
- Be resilient — ready to take on challenges in a fast-paced, ever-evolving environment.
